

EPA Headquarters

The site for the Environmental Public Authority headquarters has an area of 11,862 sq m with a built-up area of 50,000 sq m. The building has an impressively stylish design. The sloping glass-covered sides provide a

sharp contrast to the wide columns of the corners which gives this building its unique style and feel. Spaces and Concepts used products from Artemide and TAL to light up the building.

KISR building and mosque

The Kuwait Institute for Scientific Research (KISR) engages in scientific and applied research for several purposes, including preserving the environment, serving the economy, advising the government of scientific issues and

others. Spaces and Concepts provided lighting solutions for KISR's new main building and mosque with products by TAL, Platek, Artemide, Thorlux, Disan, Fosnova and Novolux. The mosque is ready.

Central Food Control Lab

For Kuwait Municipality's new Central Food Control Lab building, Spaces and Concepts used lighting products from Martini and TAL. Total buildup area for this project is 11,705 sqm.

Let there be light!

Kuwait Building on Fahd Al-Salem St. in downtown Kuwait City is constructed with an aesthetically pleasing appearance and incomparable quality products from internationally renowned sources. The building is one of the few buildings in Kuwait that have external facade lighting,

designed by Spaces and Concept's renowned lighting designers. Light fittings are procured from TAL - Belgium, Artemide - Italy, Platek - Spain and Martin - Italy. The highlight (pun intended) of the building is a stunning, custom-made chandelier from TAL in the lobby.

POWER MEETS BEAUTY

With Beaufort, TAL launches a brand new LED technology that will knock the lighting world off its feet by a metaphorical fierce gust of wind. The name 'Beaufort' is put together from the words 'beau' and 'fort'; a combination of beauty and power, splendor and strength. This combined action of beauty and power reveals itself in the fact that Beaufort delivers a pleasant warm white light of 2700K (the atmosphere of the incandescent light bulbs) together with a high output; a combination that was, up until now, impossible to obtain. Beaufort does not only produce a powerful and

a well-defined beam, the module also looks splendid and refined. In short: Power meets beauty. Beaufort makes use of the chip-on-board technology (COB), a production technique where the chips are mounted directly on the PCB. The chips are encapsulated by a phosphorus coating which isolates and protects them. This makes it possible to produce a higher efficiency than any other combination or by mixing leds. The different, adjacent chips in one chip-on-board module act as one singular led which, by means of a high output lens, casts a perfect light beam without any shadows.

FLORENSIS

Ross Lovegrove

Artemide®

"Florensis is new concept in lighting aesthetics for all kinds of applications. Its floral bud has been arrived at through a unique way of creating form; the convergence of two different flows and processes. The host form has been extruded in a linear way, suggesting upward growth, whereas the 'Bud' has been machined into its nature form, opening up beautiful botanical apertures and veins that diffuse both light and heat. The light therefore washes back through the complex shapes whilst orientating the light up ward and outward,

in essence a known typology but in identity something with a fresh new Industrial beauty".

Ross Lovegrove 2013

The head of the lamp, obtained through a highly innovative process, has both an aesthetic and a technological function. Lovegrove's organic design translates the requirements of the LED technology into a floral shape that diffuses indirect light and interacts with air to promote heat dissipation. Florensis comes in the dimmable floor and wall versions.

Ross Lovegrove is a designer and visionary who's work is considered to be at the very apex of stimulating a profound change in the physicality of our three dimensional World. Inspired by the logic and beauty of nature his designs possess a trinity between technology, materials science and intelligent organic form, creating what many industrial leaders see as the new aesthetic expression for the 21st Century. There is always embedded a deeply human and resourceful approach in his designs, which project an optimism, and innovative vitality in everything he touches from cameras to cars to trains, aviation and architecture.

Integrated team... great and effective lighting solutions

For over a decade, Spaces & Concepts has rapidly become the fastest growing company in Kuwait recognized for its unsurpassable quality and professionalism and for being the sole agent for some of the world's leading lighting manufacturers. We already have made a name in the industry for being the company to work with where design simplicity and peace of mind is foremost amongst top architectural firms, engineers and high-end residential clients. To give a distinctive touch to each project, we stress on every detail and give each a unique identity.

S&C highly skilled designers team: ready for challenge

Our senior lighting designer takes on the role of lighting manager, and designs with our expert team full lighting layouts in Auto Cad specifically focusing on the project brief, its budget and

constraints. 3D realizations can be then be processed to see the virtual design and of course, switching layouts, electrical points and lighting calculations can all be provided as necessary.

The highly skilled team of designers is ready to design and draw with AutoCAD and 3D Max, and able to do Lux Calculation.

The design team are flexible and can rearrange the plans as the project develops or alters and if budgets are reduced we will accommodate the new constraints without compromising the desired design.

We have a follow up procedure to ensure client satisfaction and we stand over every part of the process we are involved in which means we are always at hand even when the project is complete.

Wataniya Telecom. New head quarter

One of Kuwait's most important construction projects - The Wataniya Telecom Building

Spaces and Concepts won a contract to import and install metal ceilings which were imported specifically from Spain and custom-made to meet the specifications required for the Wataniya Telecom - Headquarters project.

With its long history in the lighting field, Spaces and Concepts Lighting won a contract to supply and install the project.

Lighting units from major international companies such as TAL, Artemide, Thorlux, and Treciluce were imported and installed.

SPACES & CONCEPTS Co. Decoration and Furniture Department:

Credibility and reputation excel with every delivered project

The Department was launched in 2008. The lively growth that we have enjoyed can be attributed to a remarkable approach of relationship-building and client service among our outstanding team of professionals. Credibility and reputation excel with every delivered project.

SPACES & CONCEPTS will always continue to strengthen its position in the target market area by providing superior customer service to clients. The keys to success for our company are variety of reputable brands, marketing and networking, responsiveness and quality of customer service, providing

successful cost-effective solutions at all times, and generating repeated customers. Our experienced team includes Architects, Interior Designers, Site Engineers, Foremen, and qualified staff of carpenters, ceiling team, painters, flooring installers, and special decorators.

We deliver services providing the best products to market, our lines of Products include:

- a. Turnkey Solutions
- b. Office Furniture (High-end & Middle Class Brands)
- c. Home Furniture (Elite and Luxury Brands)
- d. School Furniture
- e. Cinemas & Conference Halls Furniture & Equipments
- f. Doors Accessories (Fashionable and Quality)
- g. Carpet & Parquet
- h. Curtains
- i. Specialized interior finishes

(Fabric, Panels, decorative items, etc.)

Our experience in Interior Decoration includes the design and execution of:

- a. Commercial projects (Offices, Cinemas, Halls, Showrooms, Shops, etc.)
- b. Residential Projects (Villas, Apartments, Chalets, etc.)
- c. Specialized Projects (Private & Public)

Major Projects done by S&C

- a. Media Phone Company (Sharq, Sanbil Tower): Decoration & MEP works for Head office.
- b. Marzouk Alsultan Co. (Shuwaikh, facing banks): Decoration works.
- c. Capital Standards Co. (Sharq, Ahmad Aljaber Street): Decoration & MEP works for Head office.
- d. 2 Cinema Halls in Guinea Equatorial (200 chairs): Decoration and furniture
- e. Y Residence (Salmiya, Midan Hawali): Doors & Cabinets for 5 stars apartments
- f. Sara Tower (Fintas): Doors for 5 stars apartments
- g. 3 Companies for NOOR Telecom, Wataniya, & Plexus (Salhiya): Decoration & MEP works for Head offices.
- h. Awtad Tower (Sharq, Dasman): Flooring Parquet (ap. 14,000 m2).
- i. Dental 8 Clinic (Hawali, Bahar Center): Decoration Works
- j. MIDAS New Showroom in Qatar (9000m2): Decoration & MEP works.
- k. Wataniya Telecom. New head quarter (Soor Street): Metal and Gypsum ceiling works at typical floors
- l. 2 Companies for Future Tech Co. and Rawafid Co.: Decoration & MEP works for Head office.

The new BERRIER

The BERRIER is designed as respect for Franck Berrier, French footballer of SV Zulte Waregem and well recognized for his great technique. This same great technique is also part of the fixture 'BERRIER' and in combination with the nice round design it makes this fixture a real beauty.

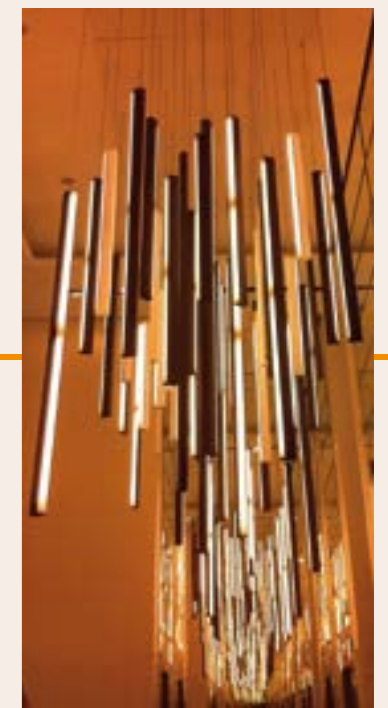

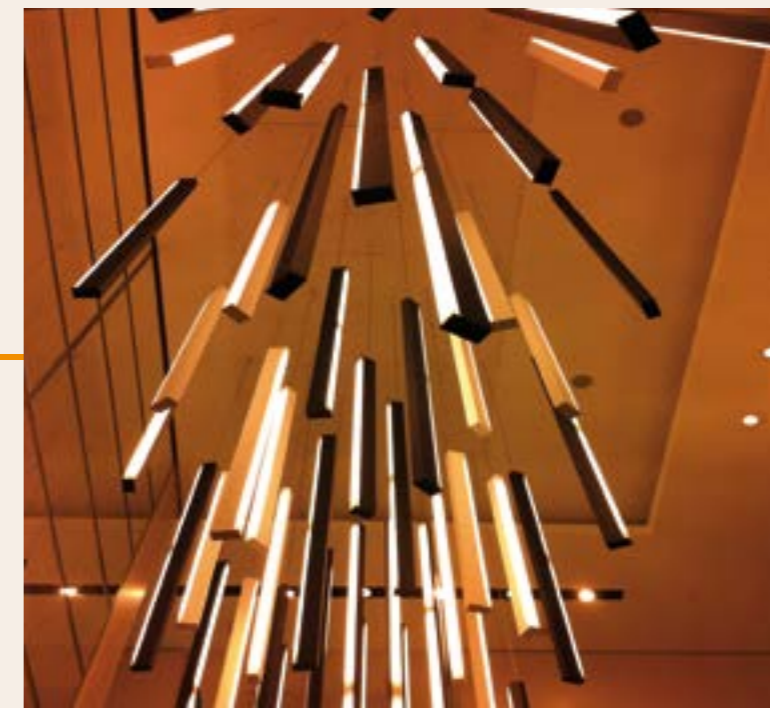

Energy saving high performance LED area floodlights complete with aluminium columns

High performance LED area floodlights. Cast aluminium head unit with polycarbonate cover. Upward light ratio (ULR) 3%. Supplied complete with column assembly for fast and efficient installation. Wall mounted versions available. Optional retrofit fit kits available for fitting to existing steel columns. Applications: car parks, walkways, hospitals and other public areas.

TALzine

Custom made Chandelier made out of U2 Profile for Kuwait Building on Fahd Al-Salem Street in downtown Kuwait City.

PLATEK
LONG-LASTING LIGHTS

Strasbourg's architectural heritage lit up by **Platek** Light

Strasbourg, the capital of the Alsace region, has always been an important European crossroads ever since ancient times, as its Germanic and Latin names imply: 'Strate Burgum' ('city at the crossroads'). Today, Strasbourg is a cosmopolitan city, sitting halfway between Paris and Prague.

The permanent seat of the European Parliament, the Council of Europe and the European Court of Human Rights, Strasbourg has been the favoured abode of many a famous figure in history, such as Gutenberg, Calvin, Goethe, De Lisle and Pasteur, among others. A city of breathtaking beauty, its historic centre was classified a UNESCO World Heritage site in 1988.

As part of a project to beautify the architectural heritage in the heart of the city, the Urban Community of Strasbourg commissioned

Platek Light to provide the lighting. Indeed, Platek Light is responsible for illuminating the most important sights along the banks of the River Ill, which flows through the city centre and the characteristic Petite France district. Sights include the late 17th-century Barrage Vauban (also known as the Grande Ecluse), a weir that once formed part of the city defences; the Pont Sainte Madeleine and Pont Saint-Martin fortified bridges (known jointly as the Ponts des murs couverts); the Palais des Rohan, a residential palace belonging to the influential

Rohan family, four members of which consecutively held the office of Bishop of Strasbourg diocese throughout the 18th Century; and the Ancienne Douane (old customs-house).

SPACES & CONCEPTS S.A.R.L.
LIGHTING DESIGN & SUPPLY

The **first choice** lighting company in Lebanon

Spaces & Concepts Lighting Design & Supply S.A.R.L. was established in 2011 under the canopy of its mother company Spaces & Concepts General Trading & Contracting Company-Kuwait. Derived from the necessity to bring quality lighting products, design and services to Lebanon and Middle East region, it has built up a reputation with the top construction and architectural companies around the Middle East as being the first choice lighting company to deal with where unique design, product knowledge and innovation is needed.

Energy and the efficiency of its use is a fundamental part of what we stand for, the challenge is to ensure that the design retains integrity, sustainability and ultimately achieves the brief set down by you. Starting from a team of four it has grown to over 70 specialised staff chosen for their unique talents that have brought the standard of our services to a new height never seen before in the Middle East region. Our team of lighting professionals are dedicated to working in partnership

with many of the leading architects and designers, developing sophisticated lighting solutions to transform residential and commercial lighting environments. Our goal is to exceed customer expectations and set the standard for quality customer service in the lighting industry. With our flexible, quality-conscious and client-oriented approach we aim to be an exceptional partner for our clients.
